

Bridging the Gap: Summer Classes for Transitioning Students Under the Aspirational Block Programme - A Narnoor Initiative in Association with Nirmaan Organization & ITDA

(www.abpnarnoor.info)

In a significant educational initiative, we are conducting summer classes for 10th grade students who are transitioning from a Telugu medium to an English medium curriculum. Understanding the challenges this change brings, especially in core subjects, we have launched a comprehensive summer program to support these students in **English, Mathematics, and Science (both Physical and Biological Sciences)**.

The summer classes are attended by students from several schools, including AHS Narnoor, AHS Utnoor, and AHS Indravelly. **This program is a part of the Aspirational Block Programme Narnoor initiative and is conducted in association with the Nirmaan Org**, which has been instrumental in providing educational support and resources.

Program Details:

- **Duration:** May 15 to June 15
- **Total Students:** 60
- **Subjects Covered:** English, Mathematics, Physical Science, and Biological Science

Objective:

The primary objective of these summer classes is to ensure that students can effectively cope with the academic demands of the upcoming school year. Transitioning to a different medium of instruction can be daunting, and we aim to make this shift as smooth as possible by strengthening their foundation in essential subjects.

Participating Schools:

- AHS Narnoor
- AHS Utnoor
- AHS Indravelly

This initiative not only focuses on academic enhancement but also aims to build confidence among students in using English as a medium of instruction. The interactive and engaging teaching methods adopted by our dedicated educators ensure that students remain interested and motivated throughout the program.

By the end of this summer program, we hope to see a marked improvement in the students' understanding and command of English, Mathematics, and Science. This will undoubtedly ease their transition into the English medium and help them excel in their academic pursuits.

We are grateful for the support from the **Nirmaan Organization** and the active participation of the schools involved. Together, we are committed to providing quality education and fostering an environment where students can thrive despite the challenges posed by changes in the medium of instruction.

As we continue to monitor and evaluate the progress of this initiative, we remain optimistic about the positive impact it will have on the students' academic journeys. This summer program is a testament to our dedication to enhancing educational outcomes and preparing our students for a successful future. Groups have been formed on basis of their understanding of learning and special care taken of each student. Participatory method using 5W 1H formula, Involvement of students in Reading, Writing knowing the meaning of each word

We look forward to sharing more updates and success stories as the program progresses. Stay tuned for more highlights from our summer classes!
